

## 1. Description

### 1.1. Project

|                 |                             |
|-----------------|-----------------------------|
| Project Name    | vccgnd_bluepill_stm32f103cb |
| Board Name      | custom                      |
| Generated with: | STM32CubeMX 6.15.0          |
| Date            | 08/08/2025                  |

### 1.2. MCU

|                |               |
|----------------|---------------|
| MCU Series     | STM32F1       |
| MCU Line       | STM32F103     |
| MCU name       | STM32F103CBTx |
| MCU Package    | LQFP48        |
| MCU Pin number | 48            |

### 1.3. Core(s) information

|         |               |
|---------|---------------|
| Core(s) | Arm Cortex-M3 |
|---------|---------------|

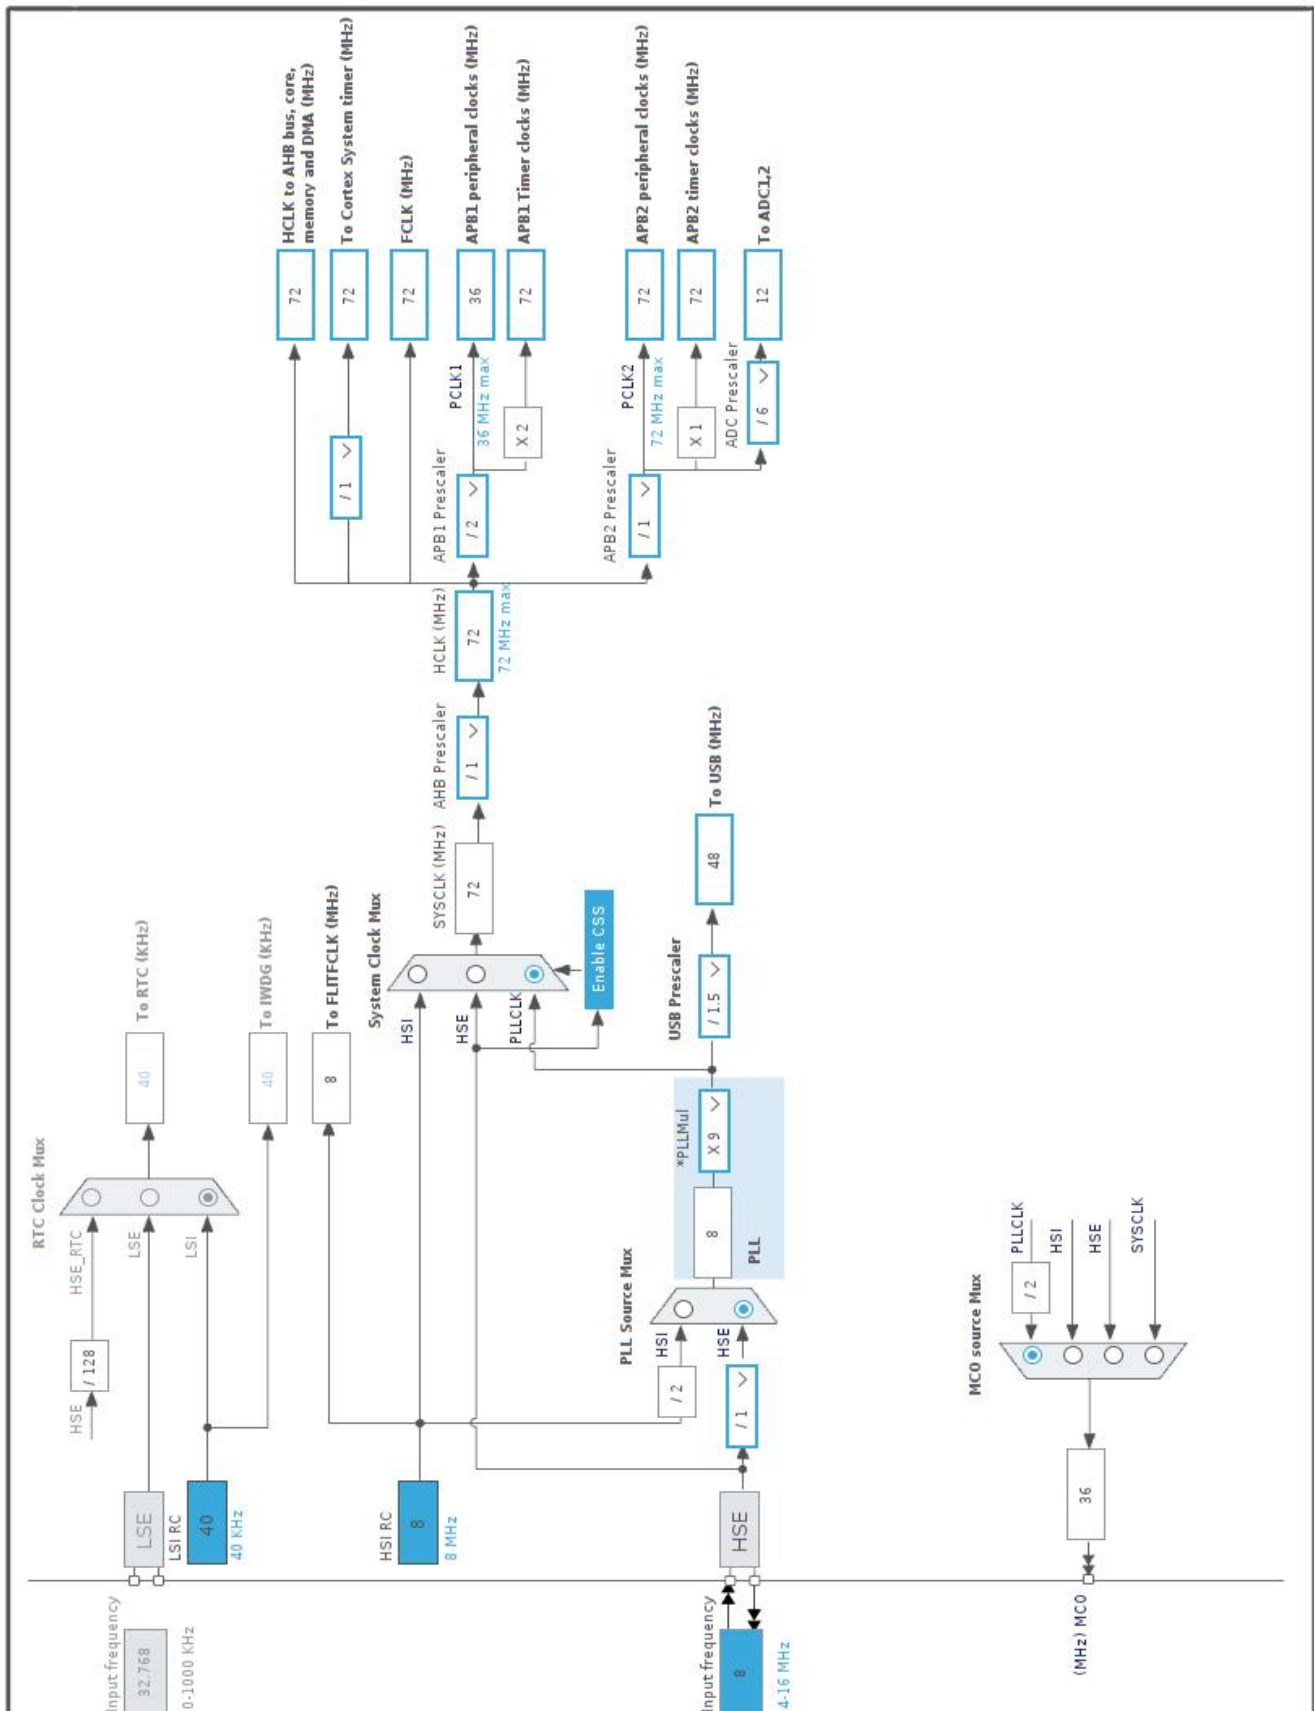

### 3. Pins Configuration

| Pin Number<br>LQFP48 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label     |
|----------------------|---------------------------------------|----------|--------------------------|-----------|
| 1                    | VBAT                                  | Power    |                          |           |
| 2                    | PC13-TAMPER-RTC *                     | I/O      | GPIO_Output              | USER_LED  |
| 3                    | PC14-OSC32_IN                         | I/O      |                          |           |
| 4                    | PC15-OSC32_OUT                        | I/O      |                          |           |
| 5                    | PD0-OSC_IN                            | I/O      | RCC_OSC_IN               |           |
| 6                    | PD1-OSC_OUT                           | I/O      | RCC_OSC_OUT              |           |
| 7                    | NRST                                  | Reset    |                          |           |
| 8                    | VSSA                                  | Power    |                          |           |
| 9                    | VDDA                                  | Power    |                          |           |
| 10                   | PA0-WKUP                              | I/O      | ADC1_IN0                 |           |
| 11                   | PA1                                   | I/O      | ADC1_IN1                 |           |
| 12                   | PA2                                   | I/O      | ADC1_IN2                 |           |
| 13                   | PA3                                   | I/O      | ADC1_IN3                 |           |
| 14                   | PA4                                   | I/O      | ADC1_IN4                 |           |
| 15                   | PA5                                   | I/O      | ADC1_IN5                 |           |
| 16                   | PA6                                   | I/O      | ADC1_IN6                 |           |
| 17                   | PA7                                   | I/O      | ADC1_IN7                 |           |
| 18                   | PB0                                   | I/O      | ADC1_IN8                 |           |
| 19                   | PB1                                   | I/O      | ADC1_IN9                 |           |
| 20                   | PB2 *                                 | I/O      | GPIO_Analog              | BOOT1     |
| 21                   | PB10                                  | I/O      | I2C2_SCL                 |           |
| 22                   | PB11                                  | I/O      | I2C2_SDA                 |           |
| 23                   | VSS                                   | Power    |                          |           |
| 24                   | VDD                                   | Power    |                          |           |
| 25                   | PB12                                  | I/O      | SPI2_NSS                 |           |
| 26                   | PB13                                  | I/O      | SPI2_SCK                 |           |
| 27                   | PB14                                  | I/O      | SPI2_MISO                |           |
| 28                   | PB15                                  | I/O      | SPI2_MOSI                |           |
| 29                   | PA8                                   | I/O      | RCC_MCO                  |           |
| 30                   | PA9                                   | I/O      | USART1_TX                |           |
| 31                   | PA10                                  | I/O      | USART1_RX                |           |
| 32                   | PA11                                  | I/O      | USB_DM                   |           |
| 33                   | PA12                                  | I/O      | USB_DP                   |           |
| 34                   | PA13                                  | I/O      | SYS_JTMS-SWDIO           | SYS_SWDIO |
| 35                   | VSS                                   | Power    |                          |           |
| 36                   | VDD                                   | Power    |                          |           |

| Pin Number<br>LQFP48 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label     |
|----------------------|---------------------------------------|----------|--------------------------|-----------|
| 37                   | PA14                                  | I/O      | SYS_JTCK-SWCLK           | SYS_SWCLK |
| 42                   | PB6                                   | I/O      | I2C1_SCL                 |           |
| 43                   | PB7                                   | I/O      | I2C1_SDA                 |           |
| 44                   | BOOT0                                 | Boot     |                          |           |
| 45                   | PB8                                   | I/O      | CAN_RX                   |           |
| 46                   | PB9                                   | I/O      | CAN_TX                   |           |
| 47                   | VSS                                   | Power    |                          |           |
| 48                   | VDD                                   | Power    |                          |           |

\* The pin is affected with an I/O function

## 4. Clock Tree Configuration

## 1. Power Consumption Calculator report

### 1.1. Microcontroller Selection

|           |               |
|-----------|---------------|
| Series    | STM32F1       |
| Line      | STM32F103     |
| MCU       | STM32F103CBTx |
| Datasheet | DS5319_Rev17  |

### 1.2. Parameter Selection

|             |     |
|-------------|-----|
| Temperature | 25  |
| Vdd         | 3.3 |

### 1.3. Battery Selection

|                   |                 |
|-------------------|-----------------|
| Battery           | Li-SOCL2(A3400) |
| Capacity          | 3400.0 mAh      |
| Self Discharge    | 0.08 %/month    |
| Nominal Voltage   | 3.6 V           |
| Max Cont Current  | 100.0 mA        |
| Max Pulse Current | 200.0 mA        |
| Cells in series   | 1               |
| Cells in parallel | 1               |

#### 1.4. Sequence

|                               |  |              |
|-------------------------------|--|--------------|
| <b>Step</b>                   | Step1  | Step2        |
| <b>Mode</b>                   | RUN  | STOP         |
| <b>Vdd</b>                    | 3.3  | 3.3          |
| <b>Voltage Source</b>         | Battery  | Battery      |
| <b>Range</b>                  | No Scale   | No Scale     |
| <b>Fetch Type</b>             | FLASH  | n/a          |
| <b>CPU Frequency</b>          | 72 MHz   | 0 Hz         |
| <b>Clock Configuration</b>    | HSE PLL  | Regulator LP |
| <b>Clock Source Frequency</b> | 8 MHz  | 0 Hz         |
| <b>Peripherals</b>            | ADC1 APB1-Bridge APB2-Bridge GPIOA GPIOB<br>GPIOC GPIOD I2C1 I2C2<br>SPI2 USART1 USB |              |
| <b>Additional Cons.</b>       | 0 mA   | 0 mA         |
| <b>Average Current</b>        | 35.2 mA  | 14 $\mu$ A   |
| <b>Duration</b>               | 0.1 ms   | 0.9 ms       |
| <b>DMIPS</b>                  | 61.0   | 0.0          |
| <b>Ta Max</b>                 | 98.61  | 105          |
| <b>Category</b>               | In DS Table  | In DS Table  |

#### 1.5. Results

|               |                              |                 |            |
|---------------|------------------------------|-----------------|------------|
| Sequence Time | 1 ms                         | Average Current | 3.53 mA    |
| Battery Life  | 1 month, 9 days,<br>15 hours | Average DMIPS   | 61.0 DMIPS |

#### 1.6. Chart

## 2. Software Project

### 2.1. Project Settings

| Name                              | Value  |
|-----------------------------------|--|
| Project Name                      | vccgnd_bluepill_stm32f103cb  |
| Project Folder                    | /store/EmbedTools/STM32CubeMX/vccgnd_bluepill/vccgnd_bluepill_stm32f103c |
| Toolchain / IDE                   | CMake  |
| Firmware Package Name and Version | STM32Cube FW_F1 V1.8.6   |
| Application Structure             | Advanced   |
| Generate Under Root               | No   |
| Do not generate the main()        | No   |
| Minimum Heap Size                 | 0x200  |
| Minimum Stack Size                | 0x400  |

### 2.2. Code Generation Settings

| Name  | Value   |
|---|---|
| STM32Cube MCU packages and embedded software                    | Copy all used libraries into the project folder |
| Generate peripheral initialization as a pair of '.c/.h' files   | No  |
| Backup previously generated files when re-generating            | Yes   |
| Keep User Code when re-generating                               | Yes   |
| Delete previously generated files when not re-generated         | Yes   |
| Set all free pins as analog (to optimize the power consumption) | Yes   |
| Enable Full Assert  | Yes   |

### 2.3. Advanced Settings - Generated Function Calls

| Rank | Function Name       | Peripheral Instance Name |
|------|---------------------|--------------------------|
| 1    | SystemClock_Config  | RCC                      |
| 2    | MX_GPIO_Init        | GPIO                     |
| 3    | MX_USART1_UART_Init | USART1                   |
| 4    | MX_ADC1_Init        | ADC1                     |
| 5    | MX_I2C1_Init        | I2C1                     |
| 6    | MX_I2C2_Init        | I2C2                     |
| 7    | MX_SPI2_Init        | SPI2                     |
| 8    | MX_CAN_Init         | CAN                      |
| 9    | MX_USB_PCD_Init     | USB                      |

## 3. Peripherals and Middlewares Configuration

### 3.1. ADC1

mode: IN0

mode: IN1

mode: IN2

mode: IN3

mode: IN4

mode: IN5

mode: IN6

mode: IN7

mode: IN8

mode: IN9

mode: Temperature Sensor Channel

mode: Vrefint Channel

#### 3.1.1. Parameter Settings:

##### **ADCs\_Common\_Settings:**

|      |                  |
|------|------------------|
| Mode | Independent mode |
|------|------------------|

##### **ADC\_Settings:**

|                |                 |
|----------------|-----------------|
| Data Alignment | Right alignment |
|----------------|-----------------|

|                      |          |
|----------------------|----------|
| Scan Conversion Mode | Disabled |
|----------------------|----------|

|                            |          |
|----------------------------|----------|
| Continuous Conversion Mode | Disabled |
|----------------------------|----------|

|                               |          |
|-------------------------------|----------|
| Discontinuous Conversion Mode | Disabled |
|-------------------------------|----------|

##### **ADC\_Regular\_ConversionMode:**

|                            |        |
|----------------------------|--------|
| Enable Regular Conversions | Enable |
|----------------------------|--------|

|                      |   |
|----------------------|---|
| Number Of Conversion | 1 |
|----------------------|---|

|                                    |   |
|------------------------------------|---|
| External Trigger Conversion Source | Regular Conversion launched by software |
|------------------------------------|---|

|             |   |
|-------------|---|
| <u>Rank</u> | 1 |
|-------------|---|

|         |           |
|---------|-----------|
| Channel | Channel 0 |
|---------|-----------|

|               |            |
|---------------|------------|
| Sampling Time | 1.5 Cycles |
|---------------|------------|

##### **ADC\_Injected\_ConversionMode:**

|                             |         |
|-----------------------------|---------|
| Enable Injected Conversions | Disable |
|-----------------------------|---------|

##### **WatchDog:**

|                             |       |
|-----------------------------|-------|
| Enable Analog WatchDog Mode | false |
|-----------------------------|-------|

## 3.2. CAN

**mode: Activated**

### 3.2.1. Parameter Settings:

#### **Bit Timings Parameters:**

|                              |                            |
|------------------------------|----------------------------|
| Prescaler (for Time Quantum) | <b>2 *</b>                 |
| Time Quantum                 | <b>55.55555555555556 *</b> |
| Time Quanta in Bit Segment 1 | <b>15 Times *</b>          |
| Time Quanta in Bit Segment 2 | <b>2 Times *</b>           |
| Time for one Bit             | 1000                       |
| Baud Rate                    | <b>1000000 *</b>           |
| ReSynchronization Jump Width | 1 Time                     |

#### **Basic Parameters:**

|                                   |         |
|-----------------------------------|---------|
| Time Triggered Communication Mode | Disable |
| Automatic Bus-Off Management      | Disable |
| Automatic Wake-Up Mode            | Disable |
| Automatic Retransmission          | Disable |
| Receive Fifo Locked Mode          | Disable |
| Transmit Fifo Priority            | Disable |

#### **Advanced Parameters:**

|           |        |
|-----------|--------|
| Test Mode | Normal |
|-----------|--------|

## 3.3. I2C1

### **I2C: I2C**

### 3.3.1. Parameter Settings:

#### **Master Features:**

|                      |                           |
|----------------------|---------------------------|
| I2C Speed Mode       | <b>Fast Mode *</b>        |
| I2C Clock Speed (Hz) | 400000                    |
| Fast Mode Duty Cycle | Duty cycle Tlow/Thigh = 2 |

#### **Slave Features:**

|                                  |          |
|----------------------------------|----------|
| Clock No Stretch Mode            | Disabled |
| Primary Address Length selection | 7-bit    |
| Dual Address Acknowledged        | Disabled |
| Primary slave address            | 0        |
| General Call address detection   | Disabled |

### 3.4. I2C2

#### I2C: I2C

##### 3.4.1. Parameter Settings:

###### Master Features:

|                      |                           |
|----------------------|---------------------------|
| I2C Speed Mode       | <b>Fast Mode *</b>        |
| I2C Clock Speed (Hz) | 400000                    |
| Fast Mode Duty Cycle | Duty cycle Tlow/Thigh = 2 |

###### Slave Features:

|                                  |          |
|----------------------------------|----------|
| Clock No Stretch Mode            | Disabled |
| Primary Address Length selection | 7-bit    |
| Dual Address Acknowledged        | Disabled |
| Primary slave address            | 0        |
| General Call address detection   | Disabled |

### 3.5. RCC

#### High Speed Clock (HSE): Crystal/Ceramic Resonator mode: Master Clock Output

##### 3.5.1. Parameter Settings:

###### System Parameters:

|                   |                    |
|-------------------|--------------------|
| VDD voltage (V)   | 3.3                |
| Prefetch Buffer   | Enabled            |
| Flash Latency(WS) | 2 WS (3 CPU cycle) |

###### RCC Parameters:

|                                |      |
|--------------------------------|------|
| HSI Calibration Value          | 16   |
| HSE Startup Timeout Value (ms) | 100  |
| LSE Startup Timeout Value (ms) | 5000 |

### 3.6. SPI2

#### Mode: Full-Duplex Master

#### Hardware NSS Signal: Hardware NSS Output Signal

##### 3.6.1. Parameter Settings:

**Basic Parameters:**

|              |                  |
|--------------|------------------|
| Frame Format | Motorola         |
| Data Size    | <b>16 Bits *</b> |
| First Bit    | MSB First        |

**Clock Parameters:**

|                           |                       |
|---------------------------|-----------------------|
| Prescaler (for Baud Rate) | 2                     |
| Baud Rate                 | <b>18.0 MBits/s *</b> |
| Clock Polarity (CPOL)     | Low                   |
| Clock Phase (CPHA)        | 1 Edge                |

**Advanced Parameters:**

|                 |                 |
|-----------------|-----------------|
| CRC Calculation | Disabled        |
| NSS Signal Type | Output Hardware |

### 3.7. SYS

**Debug: Serial Wire**

**Timebase Source: SysTick**

### 3.8. USART1

**Mode: Asynchronous**

#### 3.8.1. Parameter Settings:

**Basic Parameters:**

|             |                           |
|-------------|---------------------------|
| Baud Rate   | 115200                    |
| Word Length | 8 Bits (including Parity) |
| Parity      | None                      |
| Stop Bits   | 1                         |

**Advanced Parameters:**

|                |                      |
|----------------|----------------------|
| Data Direction | Receive and Transmit |
| Over Sampling  | 16 Samples           |

### 3.9. USB

**mode: Device (FS)**

#### 3.9.1. Parameter Settings:

**Basic Parameters:**

Speed Full Speed 12MBit/s

**Power Parameters:**

Low Power Disabled

Link Power Management Disabled

Battery Charging Disabled

\* User modified value

## 4. System Configuration

### 4.1. GPIO configuration

| IP     | Pin         | Signal         | GPIO mode                     | GPIO pull/up pull down      | Max Speed | User Label |
|--------|-------------|----------------|-------------------------------|-----------------------------|-----------|------------|
| ADC1   | PA0-WKUP    | ADC1_IN0       | Analog mode                   | n/a                         | n/a       |            |
|        | PA1         | ADC1_IN1       | Analog mode                   | n/a                         | n/a       |            |
|        | PA2         | ADC1_IN2       | Analog mode                   | n/a                         | n/a       |            |
|        | PA3         | ADC1_IN3       | Analog mode                   | n/a                         | n/a       |            |
|        | PA4         | ADC1_IN4       | Analog mode                   | n/a                         | n/a       |            |
|        | PA5         | ADC1_IN5       | Analog mode                   | n/a                         | n/a       |            |
|        | PA6         | ADC1_IN6       | Analog mode                   | n/a                         | n/a       |            |
|        | PA7         | ADC1_IN7       | Analog mode                   | n/a                         | n/a       |            |
|        | PB0         | ADC1_IN8       | Analog mode                   | n/a                         | n/a       |            |
|        | PB1         | ADC1_IN9       | Analog mode                   | n/a                         | n/a       |            |
| CAN    | PB8         | CAN_RX         | Input mode                    | No pull-up and no pull-down | n/a       |            |
|        | PB9         | CAN_TX         | Alternate Function Push Pull  | n/a                         | High *    |            |
| I2C1   | PB6         | I2C1_SCL       | Alternate Function Open Drain | n/a                         | High *    |            |
|        | PB7         | I2C1_SDA       | Alternate Function Open Drain | n/a                         | High *    |            |
| I2C2   | PB10        | I2C2_SCL       | Alternate Function Open Drain | n/a                         | High *    |            |
|        | PB11        | I2C2_SDA       | Alternate Function Open Drain | n/a                         | High *    |            |
| RCC    | PD0-OSC_IN  | RCC_OSC_IN     | n/a                           | n/a                         | n/a       |            |
|        | PD1-OSC_OUT | RCC_OSC_OUT    | n/a                           | n/a                         | n/a       |            |
|        | PA8         | RCC_MCO        | Alternate Function Push Pull  | n/a                         | Low       |            |
| SPI2   | PB12        | SPI2_NSS       | Alternate Function Push Pull  | n/a                         | High *    |            |
|        | PB13        | SPI2_SCK       | Alternate Function Push Pull  | n/a                         | High *    |            |
|        | PB14        | SPI2_MISO      | Input mode                    | No pull-up and no pull-down | n/a       |            |
|        | PB15        | SPI2_MOSI      | Alternate Function Push Pull  | n/a                         | High *    |            |
| SYS    | PA13        | SYS_JTMS-SWDIO | n/a                           | n/a                         | n/a       | SYS_SWDIO  |
|        | PA14        | SYS_JTCK-SWCLK | n/a                           | n/a                         | n/a       | SYS_SWCLK  |
| USART1 | PA9         | USART1_TX      | Alternate Function Push Pull  | n/a                         | High *    |            |
|        | PA10        | USART1_RX      | Input mode                    | No pull-up and no pull-down | n/a       |            |
| USB    | PA11        | USB_DM         | n/a                           | n/a                         | n/a       |            |
|        |             |                |                               |                             |           |            |

| IP   | Pin             | Signal      | GPIO mode        | GPIO pull/up pull down      | Max Speed | User Label |
|------|-----------------|-------------|------------------|-----------------------------|-----------|------------|
|      | PA12            | USB_DP      | n/a              | n/a                         | n/a       |            |
| GPIO | PC13-TAMPER-RTC | GPIO_Output | Output Push Pull | No pull-up and no pull-down | Low       | USER_LED   |
|      | PB2             | GPIO_Analog | Analog mode      | n/a                         | n/a       | BOOT1      |

## 4.2. DMA configuration

nothing configured in DMA service

### 4.3. NVIC configuration

#### 4.3.1. NVIC

| Interrupt Table                         | Enable | Preenmption Priority | SubPriority |
|---|--------|----------------------|-------------|
| Non maskable interrupt                  | true   | 0                    | 0           |
| Hard fault interrupt                    | true   | 0                    | 0           |
| Memory management fault                 | true   | 0                    | 0           |
| Prefetch fault, memory access fault     | true   | 0                    | 0           |
| Undefined instruction or illegal state  | true   | 0                    | 0           |
| System service call via SWI instruction | true   | 0                    | 0           |
| Debug monitor                           | true   | 0                    | 0           |
| Pendable request for system service     | true   | 0                    | 0           |
| System tick timer                       | true   | 15                   | 0           |
| RCC global interrupt                    | true   | 0                    | 0           |
| ADC1 and ADC2 global interrupts         | true   | 0                    | 0           |
| USB high priority or CAN TX interrupts  | true   | 0                    | 0           |
| USB low priority or CAN RX0 interrupts  | true   | 0                    | 0           |
| CAN RX1 interrupt                       | true   | 0                    | 0           |
| CAN SCE interrupt                       | true   | 0                    | 0           |
| I2C1 event interrupt                    | true   | 0                    | 0           |
| I2C1 error interrupt                    | true   | 0                    | 0           |
| I2C2 event interrupt                    | true   | 0                    | 0           |
| I2C2 error interrupt                    | true   | 0                    | 0           |
| SPI2 global interrupt                   | true   | 0                    | 0           |
| USART1 global interrupt                 | true   | 0                    | 0           |
| PVD interrupt through EXTI line 16      | unused |                      |             |
| Flash global interrupt                  | unused |                      |             |

#### 4.3.2. NVIC Code generation

| Enabled interrupt Table                 | Select for init sequence ordering | Generate IRQ handler | Call HAL handler |
|---|-----------------------------------|----------------------|------------------|
| Non maskable interrupt                  | false                             | true                 | false            |
| Hard fault interrupt                    | false                             | true                 | false            |
| Memory management fault                 | false                             | true                 | false            |
| Prefetch fault, memory access fault     | false                             | true                 | false            |
| Undefined instruction or illegal state  | false                             | true                 | false            |
| System service call via SWI instruction | false                             | true                 | false            |
| Debug monitor                           | false                             | true                 | false            |
